

# SMARTfund Cautious OBSR

## Short Form Report

Period 03 November 2008 to 03 November 2009

## INVESTMENT OBJECTIVE

To provide relatively stable returns over the medium term with the potential for some long-term capital growth.

## INVESTMENT POLICY

To achieve its investment objective, the fund will invest in a diversified portfolio of funds and other permitted investments that have a similarly diversified character.

The portfolio will be comprised predominantly of Cash, Fixed Interest Securities, Equities and Property funds.

## RISK PROFILE

This fund's risk profile is low to medium.

## MARKET & FUND REVIEW (PROVIDED BY OBSR)

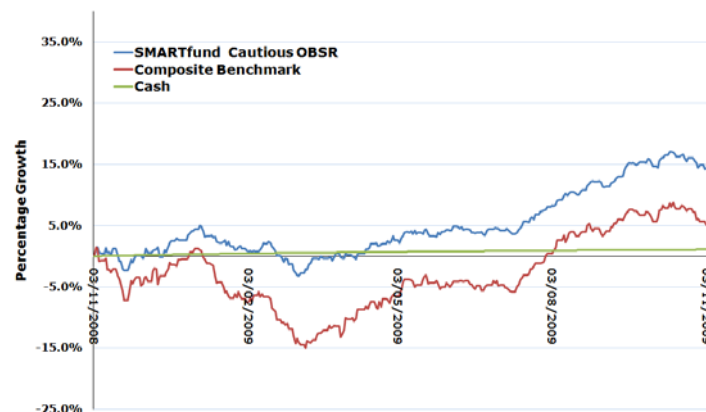

The strategic allocation for this fund has in excess of 20% in cash and given the very low returns available a tactical decision was taken to allocate a portion of this liquidity to corporate bonds. This position has been maintained throughout the last 12 months and has been extremely beneficial for overall performance. In terms of the underlying fund selection, we were faced with building portfolios that recognised the value available in every risk-based asset when the SMARTfund range was first launched versus the potential for more downside given that we were dealing with forced liquidation. The construction of the corporate bond exposure was a balance between those funds that were in a position to invest heavy cash weightings, such as the M&G Strategic Bond Fund and holding some of the funds such as Henderson Strategic Bond Fund that had been buyers on the way down and were therefore well positioned for the rally we were anticipating. In the end, all the funds we selected for the dedicated corporate bond exposure outperformed their respective indexes and the broader peer group.

On a tactical basis, a very underweight position was taken in property at the start of the fund's life but this was gradually addressed as 2009 progressed and by the 3<sup>rd</sup> quarter the fund's weighting was in line with the strategic property allocation. It should be noted that the allocation is fully invested in bricks and mortar property funds reflecting the underlying strategic allocation where the reference benchmark is the IPD UK Property Index. The strategic equity exposure is relatively modest at less than 30% and it is pleasing to note that the bulk of the selected funds have performed well against the peer groups and the relevant indexes. There were only modest changes to the selected funds over the review period with the bulk of activity focused on reweighting existing positions.

## ASSET ALLOCATION REVIEW (PROVIDED BY BARRIE & HIBBERT)

The structure of the strategic asset allocation for the Cautious fund is similar to the Defensive fund. Although an exposure to cash (or near-cash instruments) is maintained to ensure potential losses relative to cash are consistent with the specified target volatility, part of this cash exposure has been re-allocated to corporate bonds, property and equities, approximately in proportion. As a result, the property and equity exposure within the strategic asset allocation has increased to 41%. This generates some additional expected return with an associated increase in target volatility to approximately 7-8% pa.

## PERFORMANCE REVIEW

### Annual Percentage Growth - 03.11.2009

SMARTfund Cautious OBSR	Composite Benchmark	Cash
14.3%	5.1%	1.1%

### PAST PERFORMANCE SHOULD NOT BE SEEN AS A GUIDE TO FUTURE PERFORMANCE

The performance figures above are based on a notional unit issued on the date of inception of the sub-fund, with an initial capital value the same as the minimum investment amount for that fund. The notional unit is based on the AMC including zero (0%) Adviser Charging and therefore reflects performance after all other expenses that would be included in the TER. The red benchmark is a composite of the following ETFs: LYXOR F ALL LYXOR ETF FTSE ALL SHARE (representing UK Equity), iShares S&P 500 (representing US Equity), iShares MSCI Europe ex-UK (representing European Equity), iShares MSCI JAPAN (representing Japan Equity), iShares MSCI Emerging Market (representing Emerging Market Equity) and iShares MSCI Pacific ex-Japan Idx (representing Asia ex Japan Equity). Each of these ETFs has been selected to represent an average market sector performance of an asset class included in the long term strategic asset allocation used to achieve the risk weighting of the fund. The percentage of the composite formed by each ETF is the same as that of the relevant asset class within that strategic asset allocation. The green benchmark represents the performance of cash based on the British Bankers Association - LIBOR 12 Month GBP rate. All data has been obtained from the Telekurs data exchange.

\*Performance data does not exist before the 03 Nov 2008 as the fund had not launched.

*There are no comparative figures for the period as this is the first annual accounting period of the scheme*

**THE VALUE OF INVESTMENTS CAN FALL AS WELL AS RISE – YOU MAY GET BACK LESS THAN YOU PAY IN**

SMARTfund Administration Ltd (6016828) is registered in England at 6 Broad Street Place, EC2M 7JH and is authorised and regulated by the Financial Services Authority under ref. 463566. ## ASSET ALLOCATION (AS AT 03 NOVEMBER 2009)

## TOTAL EXPENSE RATIO (TER)

03.11.2009

**Total expense ratio 1.79%**

The TER reflects the annual operating expenses of the SMARTfund to the average daily net asset value of each sub-fund. This does not include any Adviser Charging which is specific to each individual unitholder.

Adviser Charging: the amount of remuneration that the Investor agrees with their Adviser that the Manager will pay the Adviser for services provided.

## NOTIONAL UNITS

You should be aware that units for SMARTfund operate very differently to a conventional unit trust. Units in the SMARTfund Advantage are created and priced uniquely for each unit holder. For further information on how the unit price is calculated, you should refer to the Prospectus. If you have already invested in the SMARTfund you should login to check your own current and historic prices.

The figures below are based on a notional unit issued on the date of inception for the fund, with an initial capital value the same as the minimum investment amount for the fund, i.e. £3,000.00.

### Notional Unit Price and Income

	Highest Price	Lowest Price	Net Income
SMARTfund Cautious OBSR	£3,513.02	£2,904.05	£71.36

### Net Asset Value for Notional Unit

	03.11.2008	03.11.2009
SMARTfund Cautious OBSR	£3,000.00	£3,429.95

*There are no comparative figures for the period as this is the first annual accounting period of the scheme*
